 Application of Geometrical Properties
## $F=q v \times B$

## Applications of Geometrical Properties

## 1. (5 marks)

RSTU is a rhombus.

i) prove that triangle STB is isosceles
ii) Prove that $\angle S T U=2 \angle S B T$
iii) Hence prove that $\angle A C B$ is a right angle

## 2. (5 marks)

$A B C D$ is a rectangle and $A E=A B$.

i) Prove that $\angle D A E=\angle C B E$
ii) Prove that triangles ADE and BCE are congruent
iii) Hence prove that triangle DEC is isosceles
3. (4 marks)

$P Q R S$ is a parallelogram. $P Q$ is produced beyond $Q$ to $T$ so that $Q T=Q R$ and $P S$ is produced beyond S to U so that $\mathrm{SU}=\mathrm{PS} . \mathrm{T}, \mathrm{R}$ and U are collinear.
Prove that PQRS is a rhombus.
4. (4 marks)

ABCD is a quadrilateral where $\angle D A B=\angle C B A, \mathrm{AD}=\mathrm{BC}$.
i) Prove triangles $A D B$ and $B C A$ are congruent
ii) explain why $A C=B D$
iii) prove $A E=B E$
5. (4 marks)

Given the diagram:
(i) Prove that $\triangle Q S T$ is similar to $\triangle Q R P$.
(ii) Hence find the length of PR.
6. (3 marks)

$A B C$ is an isosceles triangle where $A B=A C$.
i) show that $A D E$ is an isosceles triangle
ii) prove that $\mathrm{DB}=\mathrm{EC}$
7. (3 marks)

i) Show that triangles ABC and KLM are similar
ii) Find CM
8. (4 marks)

In the diagram, $P Q$ is parallel to $T R, P R=Q R, \quad P S=R S ; \quad \angle P R Q=130^{\circ}$.
$T, S$, and $R$ are collinear.
i) Find $m$
ii) Find $n$
9. (2 marks)

Find $\angle E C D$
10. (4 marks)

From the diagram evaluate $x$ and $y$.
